Chapter 10: Advanced Techniques

Negative Prompts (Stable Diffusion)

Universal negative prompt template:
"worst quality, low quality, blurry, deformed, disfigured, mutated, bad anatomy, bad hands, extra fingers, missing fingers, extra limbs, fused fingers, long neck, cropped, watermark, signature, text, logo, jpeg artifacts, lowres"

For photorealism add: "cartoon, anime, illustration, painting, drawing, 3d render, CGI"
For art add: "photo, photograph, realistic, 3d, render"

451-470. MJ Style Mixing:

451. Portrait in the style of Van Gogh Starry Night, swirling brushstrokes but photorealistic face, oil painting texture, mixed media --stylize 750

452. Japanese ukiyo-e woodblock print of a modern city, traditional technique depicting contemporary subjects, flat perspective, bold outlines --niji 6

453. Art Deco poster style photograph, geometric patterns overlaid, gold and black, 1920s glamour meets modern subject --stylize 500

454. Photograph rendered as stained glass, every element as colored glass pieces with lead came lines, cathedral light --stylize 600

455. Renaissance painting composition with cyberpunk subjects, Caravaggio lighting on chrome and neon, classical meets future --stylize 400

456-470. [More Style Mix]: Impressionist landscape of a space scene, Monet-style brushwork on cosmic subjects | Bauhaus poster of a nature scene, geometric simplification | Anime style real cityscape, Studio Ghibli Tokyo | Pixel art version of a Renaissance painting | Watercolor effect on architectural photography | Comic book panel of a real news event | Blueprint technical drawing of a fantasy creature | Vintage travel poster of alien planet | Chinese ink wash painting of circuit board | Surrealist Salvador Dali perspective on modern office | Gustav Klimt gold leaf pattern on modern portrait | Banksy street art style corporate satire | Dutch Golden Age still life with modern objects | Ancient Egyptian hieroglyphic style infographic | Mondrian color block composition applied to landscape

Aspect Ratio Guide (Midjourney)

Ratio	Use Case	Command
1:1	Instagram, profile pictures, icons	--ar 1:1
4:5	Instagram portrait, Pinterest	--ar 4:5
3:4	Portraits, book covers	--ar 3:4
2:3	Posters, phone wallpapers	--ar 2:3

16:9	YouTube thumbnails, presentations	--ar 16:9
21:9	Ultrawide, cinematic	--ar 21:9
9:16	TikTok, Instagram Stories, Reels	--ar 9:16

471-500. ALL Advanced Parameters:

471. [Upscaling] Take your best generation and upscale: MJ --upbeta or --upanime, SD use Real-ESRGAN or Topaz Gigapixel AI for 4x resolution increase

472. [Img2Img] Upload a sketch and transform: "Transform this rough sketch into a photorealistic rendering, maintaining the composition and subject placement, add dramatic lighting and realistic textures" (SD img2img strength 0.6-0.8)

473. [Inpainting] Fix specific areas: Generate base image, mask the area to fix, regenerate with specific prompt for that area only. Perfect for fixing hands, faces, or adding details.

474. [ControlNet] Use pose reference: Upload a pose photo, apply OpenPose ControlNet, generate new image maintaining exact body position but changing everything else

475. [Seed consistency] For character consistency: Find a seed you like with --seed [number] in MJ. Use same seed + similar prompt to maintain face/style across multiple images.

476-480. [Composition Control]:

--no [element] removes unwanted elements in MJ

Weighted prompts: "portrait::2 background::1" emphasizes portrait

Multi-prompt: "portrait of a woman :: in a forest :: golden hour" treats each section independently

Regional prompting (SD): define different prompts for different areas of the image

481-490. [Lighting Techniques]:

"Rembrandt lighting" – triangle of light on shadow side cheek

"Butterfly lighting" – overhead, shadow under nose

"Split lighting" – exactly half lit, half shadow

"Rim lighting" – backlit outline, dark face

"Golden hour" – warm, directional, long shadows

"Blue hour" – cool, even, moody

"Neon lighting" – colorful, urban, artificial

"Candlelight" – warm, flickering, intimate

"Studio three-point" – key, fill, back, professional

"Natural window light" – soft, directional, flattering

491-500. [Camera Simulation]:

"Shot on Fujifilm X-T5" – warm, desaturated, film-like

"Shot on Hasselblad" – medium format, incredible detail, shallow DOF

"Shot on iPhone 15 Pro" – computational photography, smart HDR

"Shot on Canon 5D Mark IV" – reliable, neutral, workhorse

"Kodak Portra 400 film" – soft colors, beautiful skin tones, grain

"Cinestill 800T" – tungsten film, halation around lights, cinematic

"Polaroid" – square format, faded colors, white border, nostalgic

"Lomography" – light leaks, vignetting, oversaturated, experimental

"Infrared film" – white foliage, dark sky, surreal

"Tilt-shift lens" – miniature effect, selective focus plane"

Final Tip: The best AI image creators don't just copy prompts — they understand why each element works. Experiment with these prompts, modify them, combine techniques from different chapters, and develop your own signature style. The prompts in this guide are starting points — your creativity makes them exceptional.
